**Cutting Edge Countertops, Inc.**, located at 1300 Flagship Drive in Perrysburg, has announced an expansion plan that is designed to provide additional capacity required for its anticipated business growth over the coming years. The new 71,400 square-foot addition will increase the existing 24,000 square-foot Perrysburg facility to more than 95,000 square-feet, quadrupling its operation space. In addition to expanding production, this new construction will also increase the company's workforce by approximately 20%, to over 200 employees. The expansion will add a two-story office, manufacturing, warehousing, shipping and receiving areas. This will allow Cutting Edge to support growth in their existing locations across the states of Ohio, Michigan and Indiana, as well as new markets in the future. Rudolph Libbe Inc. is the design/build contractor and is performing the concrete, masonry, carpentry and site work. The project is scheduled for completion in the spring of 2018. Founded in 2006 by Brad Burns, Brian Burns and Jeff Erickson, all veterans of small, family-owned businesses, Cutting Edge Countertops fabricates, manufacturers, and installs countertops for both the residential and commercial markets. Cutting Edge is the premier custom countertop fabricator for the Midwest with locations throughout Ohio, Michigan and Indiana. The company offers a wide range of surfacing products such as natural stone, solid surface, quartz, and ultra-compact surfaces.

Michael Holly, Independent Branch Manager at **Charles Schwab** recently hosted a Grand Opening and Ribbon Cutting for Schwab's new branch located at 4195 Chappel Drive in Perrysburg. Family, friends, associates, clients and chamber members all joined in the grand celebration.

Sigma Technologies, Ltd. is a team of consulting, designing, and engineering professionals who provide expertise and resources to network technologies and infrastructure projects.

Ryan Hetrick founded Sigma Technologies in 1998 and continues to serve as President today. In 1999, Sigma won its first major project with a large, regional multiple system operator delivering voice, video, and data services to the greater Toledo area. Sigma was hired to provide field and design services for an upgrade of hybrid fiber coax network that served a metropolitan area with a population of over 650,000.

Over the years, Sigma has grown from just a few employees in Northwest Ohio to a large and diverse team of field technicians, drafters, designers, and engineers serving customers across the Great Lakes region. Our services and capabilities have also expanded along the way, but the one thing that remains the same is our commitment to high quality work, the satisfaction of our clients, and the personal and professional growth of our employees.
